SUMMARY

Computer Science student with experience in Java, C++, and software security concepts. Built projects involving encryption, secure communications, and data structures. Looking for a job to gain real-world experience.

EDUCATION

Boonville Highschool, Boonville, IN 47601 — *Core 40 Diploma*

AUGUST 2018 - MAY 2022

Southern New Hampshire University, Manchester, NH 03106 — *Pursuing Bachelor's in Computer Science*

AUGUST 2022 - PRESENT

Expected Graduation: October 2028

GPA: 3.7

Coursework:

- Data Structure and Algorithms
- Operating Platforms
- Software Security
- Software Development Lifecycle
- Programming Languages
- Database Systems

SCHOOL PROJECTS

Secure Software Enhancement Project — SNHU

Completed

- Enhanced app security by implementing SHA-256 hashing for data integrity verification
- Migrated application from HTTP to HTTPS by configuring SSL certificates and secure port (8443)
- Generated and managed self-signed certificates using Java Keytool
- Analyzed dependencies with OWASP Dependency-Check to identify potential vulnerabilities

SKILLS

Technical Skills

- Java (Maven, file I/O, unit testing, secure coding practices)
- Python (data handling, scripting)
- C++ (data structures, algorithms)
- SQL (basic querying, relational databases)
- Git / GitHub (version control, collaboration)
- React / JavaScript (frontend development)
- CSV data processing (large dataset handling, parsing, sorting algorithms)
- REST API fundamentals

Soft Skills

- Problem-solving and debugging complex code issues
- Technical communication (documentation, README writing, code explanations)
- Independent time management across multistage projects
- Adaptability to new tools and technologies

AWARDS

Honor Roll - Since March 2023

- Validated application functionality through manual code review and runtime testing

Course Advising System Project — SNHU

Completed

- Developed a C++ command-line application to manage and display course data for academic advising
- Designed and implemented a menu-driven interface for loading data, viewing course lists, and retrieving course details
- Built file parsing logic to read and validate structured course data from external files
- Organized course information using appropriate data structures, including prerequisite relationships
- Implemented sorting functionality to display courses in alphanumeric order
- Applied input validation and error handling to ensure reliable program execution

PERSONAL PROJECT(S)

SkyHayo! — Personal Project (Weather App)

In Progress

- Developing a dynamic web application using interactive sky visuals and mood-based environmental changes
- Implemented component-based UI using React, including animated elements such as stars and weather effects.
- Designed logic to dynamically adjust gradients and visual states based on user input or conditions
- Continuously iterating on features and UI to improve responsiveness and user experience.

LANGUAGE

English

ACTIVITIES

Volunteer Assistant:
Boonville Merchants
Association

Boonville, IN (Spring - Summer 2025)

- *Managed an information tent, answering questions and directing visitors*
- *Supervised children and coordinated with parents at activity stations*
- *Helped maintain a clean and safe environment by assisting with post-event cleanup*
- *Worked as part of the team to ensure smooth event operations*
